
NOTES:

1. Marks, label and scratch pads detailed in drg: "ATLAS SCT Alignment/ID marks"
2. Omit individual strip marks in cases of conflict with alignment marks
3. Edge strips may be identical to strips 1-768. Alternatively, implant and metal may be d.c. connected to bias ring (omitting read-out pads) and p-bias pad optionally located between strip and bias ring.

Title	Version	Date	Drawn by (Cadence)	Checked by	Dimensions	Tolerances	Scale
