System Software Issues

Murrough Landon – 3 March 2001

http://www.hep.ph.qmw.ac.uk/~landon/talks

Appropriate Software?

- Single module tests: HDMC, interactive, standalone test programs
- ...Binary Integrations (eg ROD–ROS)...
- ...Subsystems...
- Slice test: DAQ style run control, initialisation, monitoring, etc

Test Plans

- What is really required on what timescale?
- What areas should have priority if we cant produce all the software we would like by the time we would like it?

Other Tests

- Start thinking about TDAQ integration tests
- Integration with detectors and their calibration systems
