

Online Calibration Status

Murrough Landon
28 January 2015

- Status

Current Status

• Calibration panel

- Updated to tdaq-05-*
- TRT added to the empire, few extra features for LAr
- Otherwise no significant changes

• Calibration runs

- Several DAC & pedestal runs, also noise runs for LAr
 - Acceptance criteria tuned: pedestal widths too narrow!
- CPM and JEM timing scans: JEM now working OK again
 - Still need to making timing updates in database
- Energy and PMT scans
 - No signals from Tile at the moment - timing/decoding/mystery?
 - Need to check again with LAr
- PHOS4 scans
 - Online analysis now (nearly?) fixed
 - Still need to take more runs and analyse offline (more precise)
