

Online Git Migration Status

Murrough Landon
30 January 2017

- Still aiming for Friday 10 February
 - Developers should try the test repository first
 - <https://twiki.cern.ch/twiki/bin/view/Atlas/LevelOneCaloOnlineGit>
 - Temporary git repository l1calo-online-test (will be scrapped)
 - Up to date until end of last week: can now be a playground
 - All SVN users should have Developer status (will change to Master?)
 - Final repository (atlas-l1calo-online) in preparation
 - Still need to sort out tagging (convenience script)
